PROFESSIONAL SUMMARY

Full Stack Software Engineer with 15+ months of professional experience developing full-stack web applications using React.js, Next.js, Node.js, Express.js, NestJS, MongoDB, and PostgreSQL. Experienced in building REST APIs, implementing secure authentication, integrating payment solutions, and deploying applications using Docker and CI/CD workflows. Passionate about building scalable, high-performance applications with clean, maintainable code.

TECHNICAL SKILLS

- Programming Languages : JavaScript (ES6+), TypeScript, HTML5, CSS3
- Frontend : React.js, Next.js, Vue.js, React Native, Redux Toolkit, React Query, RTK Query, Zustand, Tailwind CSS, Material UI, Ant Design, Bootstrap, shadcn/ui
- Backend : Node.js, Express.js, NestJS, REST APIs
- Databases : MongoDB, PostgreSQL, Prisma ORM, Firebase, Supabase
- DevOps & Tools : Git, GitHub, Docker, CI/CD, Postman

PROFESSIONAL EXPERIENCE

Full Stack Software Engineer

InnoverSol.

Karachi, Pakistan

May 2025 - Present

- Developed and maintained 8 production-grade web applications, delivering scalable frontend and backend solutions using modern JavaScript technologies.
- Designed and implemented 50+ RESTful APIs for authentication, user management, KYC verification, and business workflows using Node.js, Express.js, NestJS, Prisma, PostgreSQL, and MongoDB.
- Built secure authentication and authorization systems, including JWT-based authentication, email verification, password reset, resend verification, and Role-Based Access Control (RBAC).
- Developed 100+ reusable, customizable, and dynamic UI components using React.js, Next.js, and Vue.js, improving development efficiency and code maintainability.
- Improved Google Lighthouse performance scores from 60 to 98 through frontend optimization, code splitting, lazy loading, image optimization, and performance best practices.
- Integrated Stripe payment processing and implemented secure payment workflows for production applications.
- Developed real-time features using Socket.IO, resolving complex synchronization and production issues across frontend and backend services.
- Built secure KYC verification APIs, including biometric fingerprint verification and identity validation workflows.
- Containerized applications with Docker, contributed to CI/CD pipelines, and successfully deployed 4+ production applications across AWS EC2, DigitalOcean, Railway, Vercel, and Hostinger.
- Fixed and resolved 70+ production issues and bugs, improving application stability, performance, and user experience.

PROJECTS

Headland

Tech: React.js • ExpressJS • PostgreSQL • Prisma • Socket.IO • Stripe • Docker

- Developed real-time communication features using Socket.IO.
- Integrated Stripe payment workflows for secure online transactions.
- Built RBAC authentication and authorization.
- Integrated REST APIs and optimized application performance.
- Deployed production-ready frontend and backend.

Lumi

Tech: Next.js (Full Stack) • PostgreSQL • Prisma • Firebase • Stripe • RBAC

- Developed a full-stack application using Next.js with integrated frontend and backend.
- Implemented RBAC with secure authentication and protected routes.
- Integrated Stripe for secure payment processing.
- Built a Gmail Add-on using Firebase for email-based workflows.
- Developed and integrated REST APIs for seamless frontend-backend communication.
- Implemented a dynamic theme switching system for a customizable user experience.
- Optimized performance and deployed the application to a production environment.

Noetic Adventure

Tech: React.js • GSAP • RTK Query • RBAC

- Developed an interactive 7-level game-based web application using React.js.
- Implemented RBAC with separate Admin and User portals.
- Built a dynamic content management system for 1,200+ game values per epoch/section.
- Developed dynamic rendering for background images, game assets, and level data.
- Integrated REST APIs using RTK Query for efficient data fetching and state management.
- Created smooth animations and interactive gameplay using GSAP.
- Built reusable, responsive React components for a scalable production application.

Veloura

Tech: Next.js • NestJS • MongoDB • RBAC

- Developed a full-stack fragrance e-commerce application using Next.js and NestJS.
- Implemented RBAC with separate Admin and Customer portals.
- Built admin modules to manage categories, products, orders, and customer reviews.
- Developed secure JWT-based authentication and authorization workflows.
- Implemented shopping cart and checkout functionality for customers.
- Developed and integrated REST APIs to support product, order, and user management.
- Built responsive, reusable UI components for a seamless shopping experience.

EDUCATION

Intermediate (HSSC) – Computer Science
Defence Higher Secondary School & College
Completed: 2026
